

# Hands-On Cadaver Training in Colon and Rectal Diseases Including Laparoscopy, Robotics, Endoscopy, and Abdominal Wall Reconstruction

**Friday, March 28, 2014**

## Training Objectives

Demonstrate techniques in the following:

### Abdominal Wall Reconstruction

- Component separation in abdominal wall reconstruction
- Mesh fixation and abdominal wall closure
- Parastomal hernia repair using biologic grafts

### Endoscopy

- Management of large colon polyps
- Management of colon perforations
- Self expanding metal stents for colonic obstruction

### Surgery

- Abdominal perineal resection
- Laparoscopic colorectal resection
- Robotic colorectal surgery
- TAMIS

100 Nicolls Rd.  
Division of Anatomical Sciences  
Health Science Center, Level 2  
Stony Brook, NY 11790

Dr. Marvin Corman teaching abdominal perineal resection

## Deadline to register is February 14, 2014

Space will be limited to 25 participants accepted on a first-come, first-serve basis. A suggested tax deductible donation of \$500 is requested to offset cost of cadavers, materials, continental breakfast, break refreshments and lunch.

To register or for more information, please contact Danielle Devlin at  
Danielle.Devlin@stonybrook.edu or 631.638.2215

## Directors

Roberto Bergamaschi, MD, PhD, FRCS, FASCRS, FACS  
Professor & Chief, Division of Colon & Rectal Surgery

Sami Khan, MD, FACS  
Associate Professor of Plastic Surgery

Juan Carlos Bucobo, MD  
Assistant Professor of Endoscopy

## Host Faculty

Marvin Corman, MD, FACS, FASCRS  
Professor of Colon & Rectal Surgery

Paula Denoya, MD, FACS, FASCRS  
Assistant Professor of Colon & Rectal Surgery

James Vosswinkel, MD, FACS  
Assistant Professor of Trauma & Critical Care
