

Foreword

This new edition of the conference on colorectal polyps that was held in Genoa in 2004, and received much acclaim both as an event and as a monograph, aims to report the recent advances in the subject 10 years after.

The purpose of the workshop is to provide a high level and up-to-date information on this topic involving some of the national and international most outstanding expert in this field. Hoping to reach out to the largest number of colleagues involved in the diagnosis and treatment of colorectal polyps, all the presentations will be published as a supplement in the Colorectal Disease Journal.
