Original Scientific Reports

Influence of Two-dimensional and Three-dimensional Imaging on Endoscopic Bowel Suturing

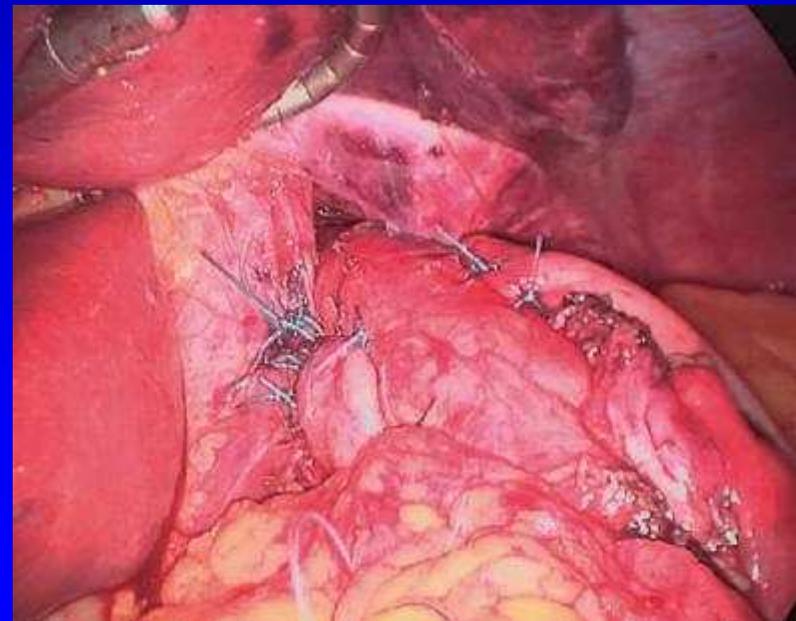

George B. Hanna, M.B. Ch.B., Ph.D., Alfred Cuschieri, M.D., Ch.M.

Buona triangolazione degli strumenti

Orientamento viscere

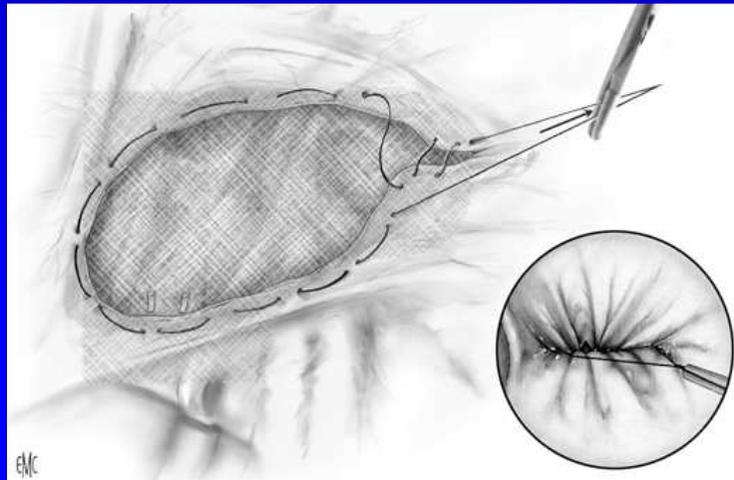

Struttura da suturare verticale

Suture difficili

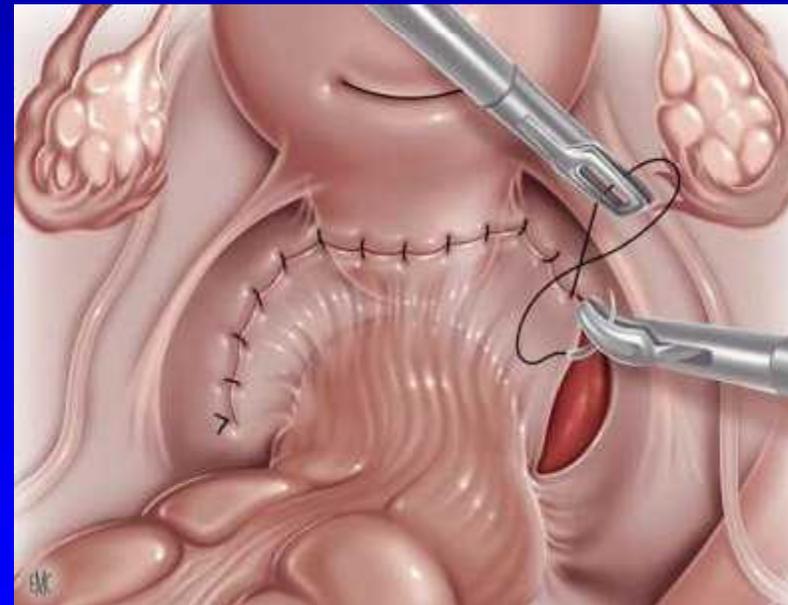

maggior affaticamento muscolare

Struttura da suturare orizzontale

Suture difficili

Difficile triangolazione degli strumenti

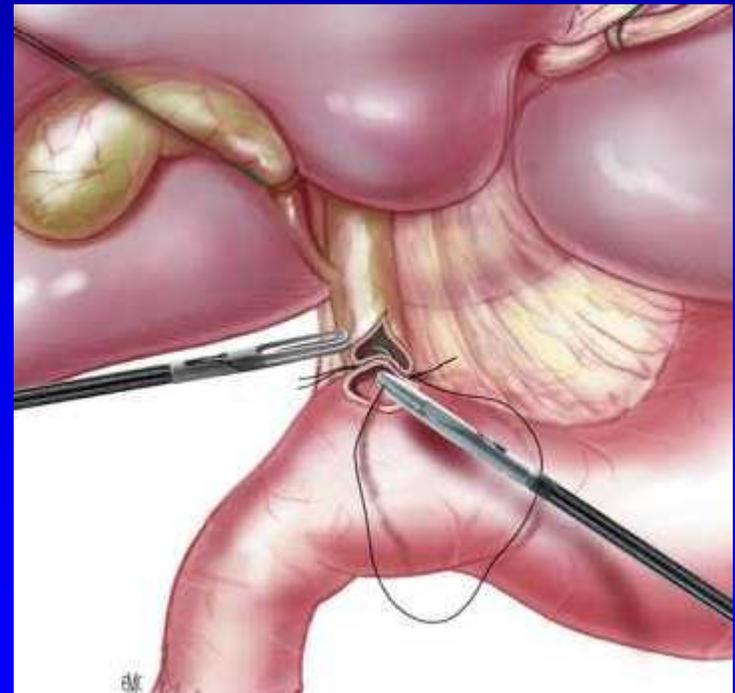

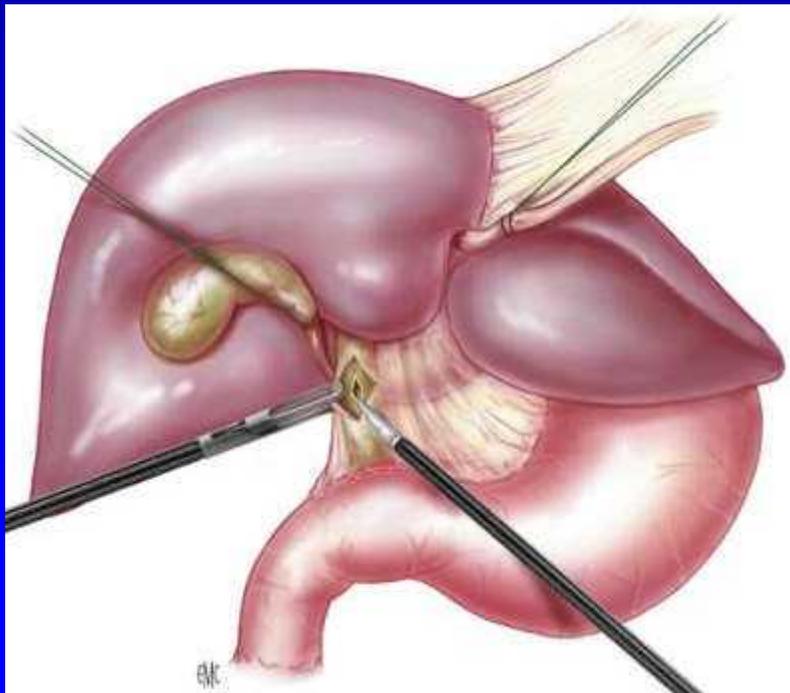

Suture difficili

Sede

- Esofago
- Stomaco: by-pass gastrico
- Tenue
- Vie biliari
- Retto basso: pelvi stretta

Tessuto

- Fragilità tessuti
- Ridotte dimensioni (es. dotti biliari).

Suture difficili

meccaniche ●

Come superare le difficoltà?

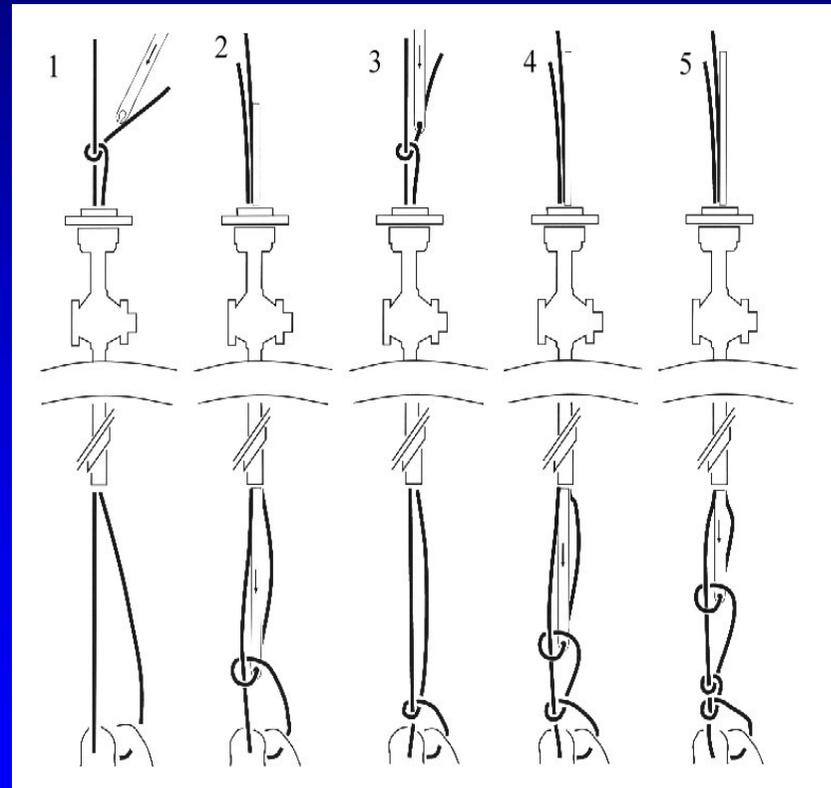

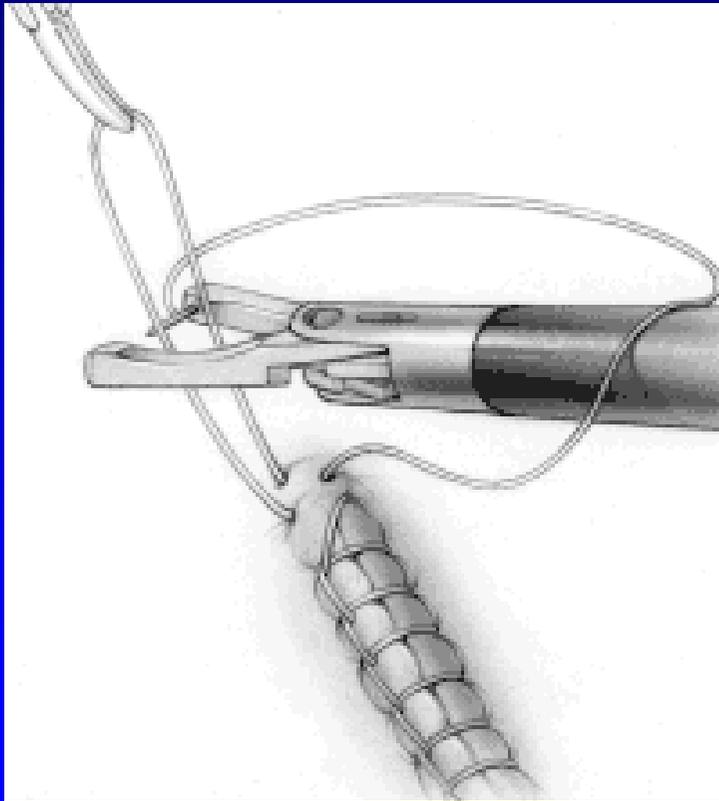

.....la tecnica

Orientamento delle strutture in
funzione della posizione del chirurgo

TRIANGOLAZIONE

.....*la tecnologia*

.....*l' esperienza*

Training laparoscopico

Grazie
