INTERNATIONAL CONFERENCE ON FAECAL INCONTINENCE

Dear Colleagues,

On behalf of the Italian Society of Colorectal Surgery and of the Italian Society of Diseases of the Digestive System, it is our great pleasure to invite you to participate in this International Conference dedicated to the treatment of Faecal Incontinence.

Faecal Incontinence has been defined a “silent affliction”, but it is certainly a very distressing and disabling condition, and its true prevalence in the general population is certainly underestimated.

In this age of advanced technology and strong search for a better quality of life, clinical research on the treatment of Faecal Incontinence has grown steadily and new procedures and devices have been proposed in this field while some others have become obsolete. The pro and contra of each technique will be shown and deeply analysed in round tables involving world’s leading experts to foster interactive discussion.

To share these exciting innovations and update some of the traditional modality of treatment we have invited to this meeting the most distinguished and renowned international faculty dedicated to this problem and therefore this will be a unique opportunity for all coloproctologists, general surgeons and gastroenterologists to focus on this clinical relevant disease, to know the most recent solutions, and, possibly, to setup a diagnostic and therapeutic algorithm for the treatment of Faecal Incontinence.

The International Conference on Faecal Incontinence will be hosted in Bari, the second most important city in the Southern mainland, seat of one of the largest university in Italy and natural, cultural and commercial hinge between east and west over the centuries.

The city of St. Nicholas with its medieval monuments and its warm weather will welcome all the participants.

We very much look forward to meeting you in our beautiful region.

Yours sincerely,

The Scientific Co-ordinator
Donato F. Altomare

Vincenzo Memeo
