

# 12th ISPP Annual Congress PELVIC FLOOR DISORDERS: CURRENT STATUS, TECHNOLOGICAL ADVANCES AND PERSPECTIVES

#### **Dear Collegues,**

The 12<sup>th</sup> annual Congress of the International Society of Pelviperineology will be held in Treviso/Venice, Italy, from October 6<sup>th</sup> to the 8<sup>th</sup>. It is a honour to organize this meeting, involving ISPP members, experts in the field of the pelvic floor from Italian and international societies having common pelvic interests. The approach to the pelvic floor belongs to urologists, gynecologists, colorectal surgeons, gastroenterologists, physiatrists, obstetricians, nurses, physiotherapists, psychologists, radiologists, sexologists, andrologists: a patient-centered vision is needed.

The themes chosen "Current status, technological advances and perspectives" have the ambitious aim to provide not only a consensus on the management of pelvic floor disorders, according to the evidence-based medicine and the international guidelines, but to look forward considering which are the perspectives of the new technologies. We hope that the numerous topics of the Congress (pelvic anatomy, mesh in prolapse surgery, chronic pelvic pain, therapy of urinary and fecal incontinence, pelvic floor imaging, innovation in pelvic floor surgery, pelvic floor rehabilitation) could stimulate participants to submit abstracts and videos showing their personal experience and current or future researches. In addition, pre and post-congress courses and workshops will let young doctors to receive training and education on specific topics. The aims of the ISPP, that will be confirmed in the congress, are to realize Masterclasses, Fellowships, the School for the Pelvic Floor Surgeon, as well as to develop technology partnership with all the interested Companies in this field.

Treviso, located in close proximity to Venice, is an amazing tourist destination and has a great deal to offer for those who are willing to explore. It has a Celtic origin, however in 89 BC the settlement was turned into a roman commune and developed into an important city. Throughout the middle age Treviso was part of the Lombard League and was involved in various sieges and conflicts, hence the need for stunning city walls and defensive towers. It is the site of the production of Prosecco wine and the birthplace of the dessert Tiramisù.

We wish to meet you in Treviso for a successful ISPP Congress 2019!
